# DILLIKUMAR JAKKALA

Tirupati, Andhra Pradesh | +91 7993819601 | kumarjakkaladilli@gmail.com | linkedin.com/in/dillikumar-jakkala-1538a4238

## PROFESSIONAL SUMMARY

Motivated and technical Software Engineer with 1 year of core industry experience in application troubleshooting, Python-based automation, and database management. Highly proficient in Core Java, Object-Oriented Design (OOD), and SQL validation. Data-driven problem solver with a proven track record of managing end-to-end incident ownership, troubleshooting complex application runtime bugs, and verifying software requirements in structured team environments.

## TECHNICAL SKILLS

- **Programming Languages:** Core Java, Python, SQL Queries, C# (Basics)
- **Software Engineering Core:** Object-Oriented Design (OOD), Software Requirements Analysis, Software Development Process (SDLC)
- **Testing & Quality Assurance:** Software Debugging, Manual Testing, Regression Testing, Test Case Design, Defect Tracking
- **Databases & Management:** MySQL, SQL Server, PostgreSQL, Table Joins, Database Integrity, Constraints
- **Operating Systems & Infrastructure:** Oracle Linux, Ubuntu Linux, Linux Commands, SSH Terminal, Process Management, Git, GitHub

## WORK EXPERIENCE

### Technical Support Analyst | Saachi Informatics Pvt. Ltd. (Hyderabad)

*Workspace: Infrastructure Operations & Production Support | Jun 2024 – May 2025*

- **End-to-End Incident Ownership:** Managed Level-1 production support and daily health monitoring for 10+ critical enterprise applications, ensuring runtime stability and SLA compliance.
- **Diagnostics & Debugging:** Applied systematic troubleshooting frameworks to isolate and resolve software logic bugs and database validation discrepancies.
- **Requirements Collaboration:** Collaborated closely with cross-functional teams to analyze software requirements and ensure safe runtime code deployments.
- **Operational Efficiency:** Leveraged custom Python scripts and core Linux commands to automate environment mapping and accelerate system log reviews.

## PROJECT HIGHLIGHT

### Enterprise Data Management & Automation Workspace

- **Java Backend Logic:** Built foundational backend components utilizing Core Java, establishing secure relational workflows and data connectivity using JDBC connectors.
- **Database Optimization:** Designed structured relational tables in MySQL Workbench, writing complex, optimized SQL scripts and Table Joins to process massive datasets.
- **Python Infrastructure Automation:** Configured and managed isolated local test environments on Linux VMs. Authored automated Python scripts to execute text scans, analyze system logs, and run daily operational health checks.
- **Quality Assurance Execution:** Formulated comprehensive test case flows and manual execution matrices to debug codebase logic and guarantee overall data integrity.

## EDUCATION

- **B.Tech (Electronics & Communication Engineering)** | PBR VITS, Kavali (2018 – 2022) | *65.71%*
- **Intermediate (12th Standard)** | SBN Junior College (2016 – 2018) | *89.90%*
- **SSC (10th Standard)** | ZP High School (2015 – 2016) | *85.00%*

## CERTIFICATIONS & CREDENTIALS

- Oracle Certified Foundations Associate – Agentic AI (Core Concept Track)
- Databases for Developers: Foundations – Oracle Dev Gym (Chris Saxon Training)
- Java Backend & System Fundamentals – 360Digrii Technical Training
- AWS One-Day Cloud Workshop – PBR VITS
