DILLIKUMAR JAKKALA

Tirupati, Andhra Pradesh | +91 7993819601 | kumarjakkaladilli@gmail.com | linkedin.com/in/dillikumar-jakkala-1538a4238

PROFESSIONAL SUMMARY

Motivated and technical Software Engineer with 1 year of core industry experience in application troubleshooting, Python-based automation, and database management. Highly proficient in Core Java, Object-Oriented Design (OOD), JavaScript fundamentals, and SQL validation. Data-driven problem solver with a proven track record of managing end-to-end incident ownership, troubleshooting complex bugs, and automating workflows. Passionate about leveraging strong full-stack programming foundations to build a long-term career developing enterprise solutions on the ServiceNow platform.

TECHNICAL SKILLS

- **Programming Languages:** Core Java, Python, JavaScript (ES6+ Basics), SQL Queries, C# (Basics)
- **ServiceNow & ITIL Foundations:** ITSM Core Concepts, Incident Management, Problem Management, Workflow Automation Architecture
- **Java & Python Full-Stack Ecosystem:** Object-Oriented Design (OOD), JDBC, Collections Framework, Multithreading basics, Python Scripting (OS, Sys, Logging libraries), REST API Integration concepts
- **Testing & Quality Assurance:** Software Debugging, Manual Testing, Regression Testing, Test Case Design, Defect Tracking
- **Databases & Management:** MySQL, SQL Server, PostgreSQL, Table Joins, Database Integrity, Constraints
- **Operating Systems & Infrastructure:** Oracle Linux, Ubuntu Linux, Linux Commands, SSH Terminal, Process Management, Git, GitHub

WORK EXPERIENCE

Technical Support Analyst | Saachi Informatics Pvt. Ltd. (Hyderabad)

Workspace: Infrastructure Operations & Production Support | Jun 2024 – May 2025

- **End-to-End Incident Ownership:** Managed Level-1 production support and daily health monitoring for 10+ critical enterprise applications, ensuring runtime stability and strict SLA compliance within an ITIL-aligned workflow environment.
- **Diagnostics & Debugging:** Applied systematic troubleshooting frameworks to isolate and resolve software logic bugs, script errors, and database validation discrepancies.
- **Requirements Collaboration:** Collaborated closely with cross-functional development teams to analyze software requirements, map out script behaviors, and ensure safe runtime code deployments.
- **Operational Efficiency:** Leveraged custom Python scripts, JavaScript utilities, and core Linux commands to automate environment mapping and accelerate system log reviews.

PROJECT HIGHLIGHT

Enterprise Data Management & Automation Workspace

- **Java Backend Logic:** Built foundational backend components utilizing Core Java, establishing secure relational workflows, handling data collections, and configuring connectivity using JDBC connectors.
- **Database & API Optimization:** Designed structured relational tables in MySQL Workbench, writing complex, optimized SQL scripts and Table Joins to process massive datasets, incorporating mock REST API responses using JavaScript/Python JSON parsers.
- **Infrastructure Automation:** Configured and managed isolated local test environments on Linux VMs. Authored automated Python scripts to execute text scans, analyze system logs, and run daily operational health checks.
- **Quality Assurance Execution:** Formulated comprehensive test case flows and manual execution matrices to debug codebase logic and guarantee overall data integrity.

EDUCATION

- **B.Tech (Electronics & Communication Engineering)** | PBR VITS, Kavali (2018 – 2022) | 65.71%
- **Intermediate (12th Standard)** | SBN Junior College (2016 – 2018) | 89.90%
- **SSC (10th Standard)** | ZP High School (2015 – 2016) | 85.00%

CERTIFICATIONS & CREDENTIALS

- **Oracle Certified Foundations Associate** – Agentic AI (Core Concept Track)
- **Databases for Developers: Foundations** – Oracle Dev Gym (Chris Saxon Training)
- **Java Backend & System Fundamentals** – 360Digrii Technical Training
- **AWS One-Day Cloud Workshop** – PBR VITS
